Side Projects

Doge Deck

tonypai.com.tw/dogedeck/

A simple tool to collect meme images, those images are Yu-Gi-Oh themed cards and full of doges, it provides people who loves meme a better way to search and contribute their creation. It went viral in a week and had 130 thousand unique visitors since the beginning.

Taiwan Travel Level

travel.tonypai.com.tw

There is one famous tool called [KKK](#) which will generate map and score based on how long and where you stay in Japan, I made a modern version for Taiwan with vanilla JS. It was on fire and attracted 700 thousand unique visitors in two weeks.

React Starter Kit

r2-starter-kit.herokuapp.com

A boilerplate for web development which built on top of React, Redux, Redux-Saga and Webpack 4, it integrated a bunch of CI tools and services. It has been maintained for almost 6 years, it is a valuable project to me.
